SKIN ATTACHMENT GUIDE

3D Snap | Skin Configuration Guide

The 3D Snap Display uses a STRETCH style fabric.
Distortion of the skin when installed is considered normal.

Create a stunning 3-dimensional display to increase your sales. Our unique frame has two planes (front and back) for integrated graphics, and infinite configurations. Our 3D Snap display series includes ***22 fabric skin sizes*** to help you create a truly unique display that leaves a lasting impression.

The portable, lightweight frame makes your display setup easy – no tools or labor required. The versatility of our expandable frame allows you to change graphics easily to create a totally fresh display. The 3D Snap display series is truly unlike any other display!

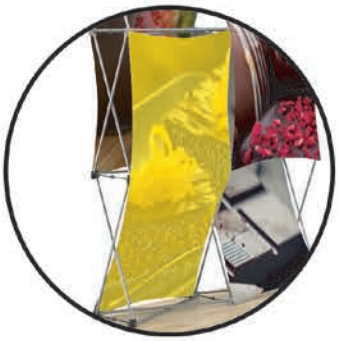

This guide will explain the differences in the various skins that will be helpful when designing or setting up your 3D Snap display.

DIAMOND
This skin appears as a diamond on the display. These skins can be attached on the front or back, but all four corners attach on the same plane.

FLAT
This skin has all four corners on one connection plane.

BEND
This skin bends from one plane (the front) to the other plane (the back), in a parallel manor.

DOUBLE BEND
This skin bends twice around the frame (in back), from one plane and attaches on the top and bottom to the other plane (the front), in a parallel manor.

SINGLE BRAID
This skin has three corner connections on one plane (in back), and one corner connection on the second plane (in front).

DOUBLE BRAID
This skin has two opposing corner connections on one plane (in front), and the other opposing corners on the second plane (the back).

GRAPHIC DESIGN SERVICES

LET OUR HIGHLY-SKILLED DESIGNERS CRAFT YOUR IDEA INTO A POLISHED MASTERPIECE.

Our graphic artists are experienced in basic to complex typesetting, layout and image placement for optimum visibility and composition balance and elaborating on initial mock-ups and sketches. Call for pricing.

RENDER SERVICES

Art must be sized and submitted on the proper template. Prior to the start of your project, our designers will provide an estimate of the amount of time required. Please contact us for additional information. Call for pricing.

BASIC RENDER

1 HOUR DESIGN TIME

- 1 View ▪ 1 Product
- No Accessories

PREMIUM RENDER

1-3 HOUR DESIGN TIME

- 1 View ▪ Multiple products
- Accessories

CUSTOM RENDER

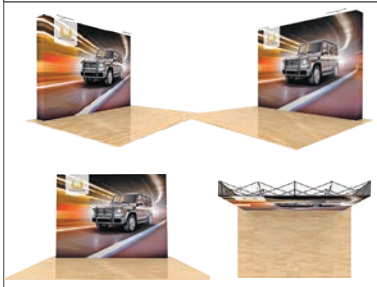

1-10 HOUR DESIGN TIME *(call for quote)*

- Customize our products to fit your show needs

WANT 4 ADDITIONAL VIEWS?

Choose your package and add +1 Hour Design Time

HOW TO PREPARE GRAPHIC FILES

TEMPLATES - SIZE

Layout guidelines and templates can be downloaded from each of the product pages on our website.

Make your graphic dimensions match the product you are purchasing.

Your image should be to size of your product at 72-150 dpi.

Bleeds: Not all products require bleeds; check guidelines for specific product requirements.

RESOLUTION - FILE TYPES

Final size files are only required to be 72–150 dpi.

You can view your file in Photoshop at 100% to see how it will look when printed.

If designing to reduced scale, adjust dpi accordingly.

We accept files from the following programs and formats: Adobe Photoshop and Adobe Illustrator: .ai, .psd, .tiff, .eps and high resolution jpg.

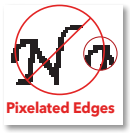

COLOR

Your print file must be in CMYK format.

Colors can look drastically different when converted from RGB. We can color match with a provided PMS code and editable files.

However, we can only guarantee color accuracy when a printed proof is ordered and approved.

BITMAP - RASTER IMAGE

Bitmaps images are made up entirely of pixels. When enlarging a bitmap image, additional pixels are added to create this new size.

The "new" pixels pick up and average colors from neighboring pixels in an attempt to create a new color that will blend between areas. This is where the overall image becomes soft and blurry and sharp defined edges develop noticeable jagged pixelated edges.

VECTOR IMAGE

Vector graphics use points, lines and curves to create an image. It's based on mathematical formulas and unlike bitmaps can be enlarged to any size, any resolution, without losing detail.

PRODUCTION TIME

All Production times are based on graphic approval and full payment.

Production will start the day following graphic approval.
